Scheuten Solar introduces Multisol[®] Vitro Module Next generation full glass PV modules made in Germany

Scheuten is constantly developing smart glass and solar solutions to complement its range of standard high performance solar modules. Thanks to sixty years of experience in the glass market Scheuten is proud to present Multisol[®] Vitro: the next generation of frameless solar modules, made in Germany. This state-of-the-art module with full glass-glass construction provides superior value compared to conventional PV modules and satisfies the latest developments in market demand.

Thanks to the glass-glass construction, Multisol[®] Vitro offers: improved sturdiness, superior robustness in harsh environments, improved fire resistance and sleek design. The recently introduced HT-float glass with crystal hard anti-reflective-coating guarantees an optimal performance. It combines the features of highly-efficient c-si technology with the conceptual advantages of frameless glass-glass products.

These unique features make Multisol[®] Vitro a premium product for on-roof applications and for integration into roofs and façades. Based on Scheuten Solar's extensive knowledge and experience, these modules are characterized by their long service life, above average yield and excellent workmanship.

"This introduction again shows the flexibility of Scheuten Solar to quickly adjust solutions to the market and to translate its glass knowledge to the PV market. As from the first quarter of 2011 we are able to offer our customers a solution for an even broader range of applications", stated Sascha Gajewski, Market & Business Development Manager of Scheuten Solar.

- END -

Scheuten is a leading and fast growing international high volume manufacturer of total solutions in glass and solar energy systems with its head office in Venlo, The Netherlands. Scheuten employs a staff of over 2000 and achieved a turnover of 407 million euro in 2009.

Scheuten Solar is a global player in designing, manufacturing, distributing and applying photovoltaic solar modules. Since Scheuten Solar was set up in 2000 it has evolved into a fully-grown organization boasting specialists in the fields of solar technology, manufacturing, project development and project realization. By managing every stage of the solar value chain Scheuten Solar guarantees the quality and performance of all products.
